

Objectives of the IOSH Managing Safely Course

IOSH Managing Safely is a course for managers and supervisors in any sector and any organization. It's designed to give managers all they need to know to help them effectively manage health and safety in their workplace. The new high impact programme covers key health and safety issues, and also includes a section on environment protection.

This course is accredited by the Institution of Occupational Safety & Health (IOSH), one of Europe's leading health and safety awarding bodies.

The IOSH Managing Safely course will cover relevant health and safety issues such as:

- The concept of "*managing safely*"
- Identifying hazards
- Assessing and controlling risks (risk assessment)
- Understanding your health and safety responsibilities (i.e. the legal framework)
- Incident and accident investigation
- Measuring performance
- Protecting our environment and environmental health and safety.

Who should attend an IOSH Managing Safely Course?

The IOSH Managing Safely course is aimed at managers and supervisors with health and safety responsibilities, but is equally valid for directors, senior officers and health and safety officers in low risk organisations. Past delegates have come from virtually every industry and internationally.

Duration

The course will be delivered over four days - either in-house for your company, or through our training Centre.

Certification

At the conclusion of the course, delegates are required to undertake a multi-format assessment and a short workplace based practical project. Delegates must complete their project and return it to us within 14 days of the course completion. Delegates who successfully complete the assessments at the end of the course are awarded the IOSH Managing Safely Certificate.
